How we sort your systems so you can knock off early.

The Lead Spring blueprint for fixing leaky funnels, locking down your data, and getting your WA business running like clockwork.

Gemini Notebook

You didn’t start a business to fight with spreadsheets at 8pm.

The current reality for most local businesses is a messy web of sticky notes, lost leads, and expensive software doing absolutely nothing. You have data scattered everywhere and barely enough hours in the day to chase it all down. It is exhausting, and it is costing you money. We know the drill, and we know exactly how to fix it.

Gemini Notebook

How we operate.

The typical agency

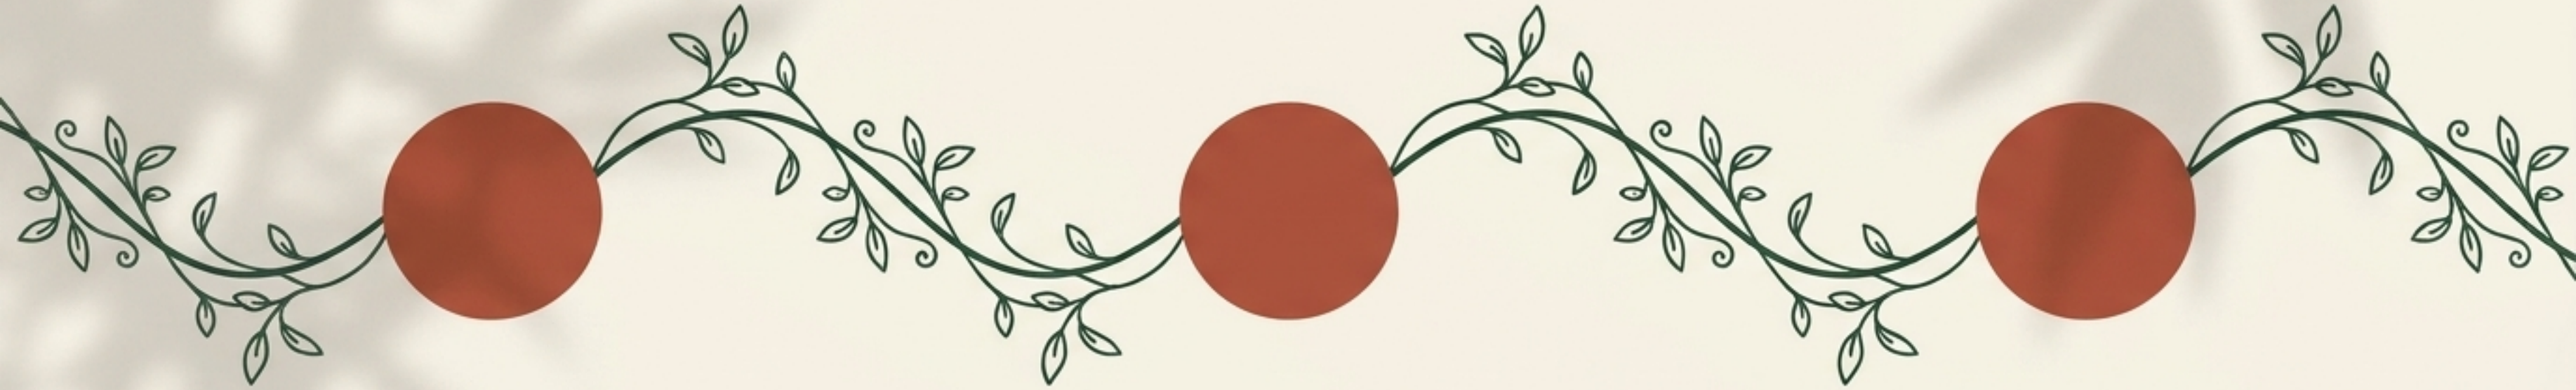

The standard agency hands you off to a junior the second the contract is signed. They speak in corporate riddles, rely on manual admin, and charge you by the hour every time the scope creeps.

The Lead Spring way

We do things differently. You deal directly with senior operators from day one. We build fixed-fee, connected systems in plain English. No generalists. No waffle. We just get it done.

Gemini Notebook

The path to a sorted business.

The deep dive.
We diagnose the exact gaps in your current setup.

The boring stuff.
We lock down your data and build a secure foundation.

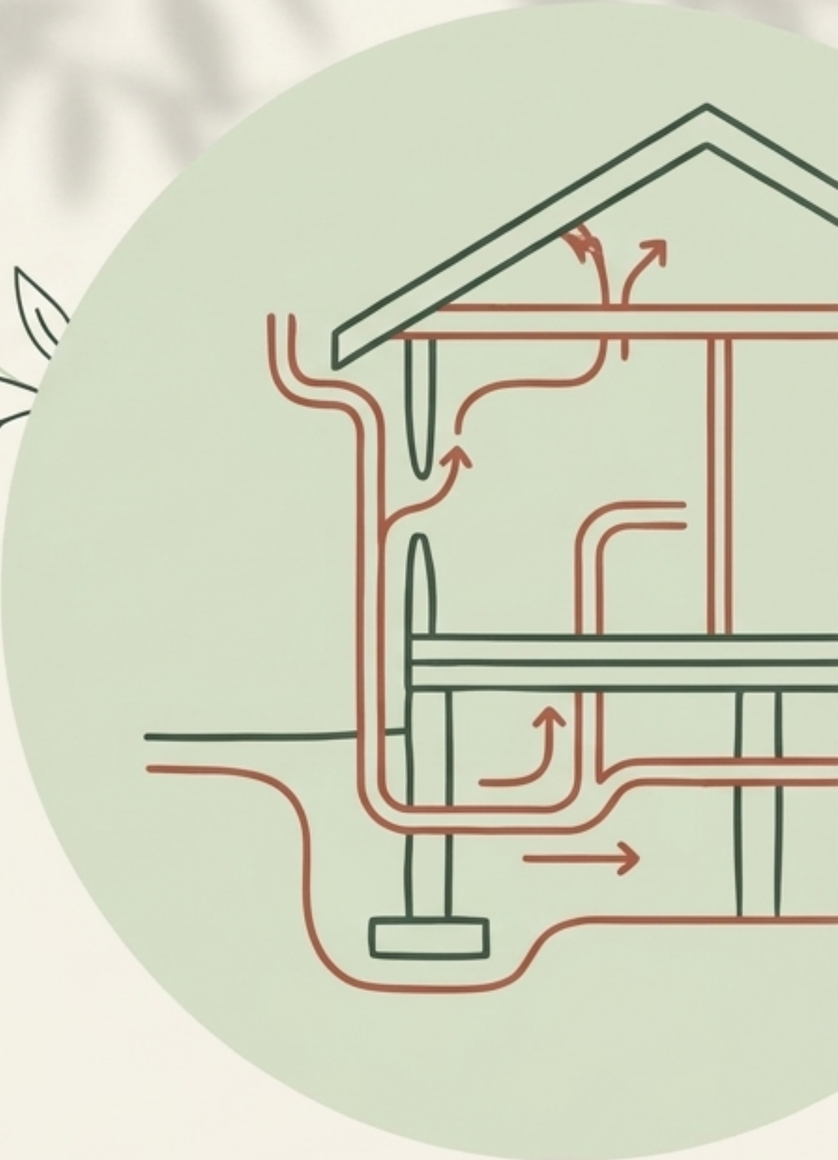

The connected flow.
We build the system and flip the switch in thirty days.

Gemini Notebook

step one

We don’t guess, we diagnose.

Jumping straight into a build is how you end up with a mess. We start every project with a flat six-hundred dollar deep dive audit. In five days, we map out your exact lead flow, find the leaks, and hand you a ninety-day action plan. This roadmap pays for itself immediately by stopping you from buying the wrong software or building useless workflows.

Gemini Notebook

step two

Locking down the boring stuff.

Keeping the government happy

We configure your database to strictly follow the Australian Privacy Principles. We ensure there is no excessive data collection and that everything is properly encrypted. We handle the compliance so the regulators stay completely happy.

Keeping your system secure

Your customer details stay safely inside your walls. We design digital environments that never leak sensitive information to the public internet. We build solid, impenetrable defence right into the foundation of your business.

Gemini Notebook

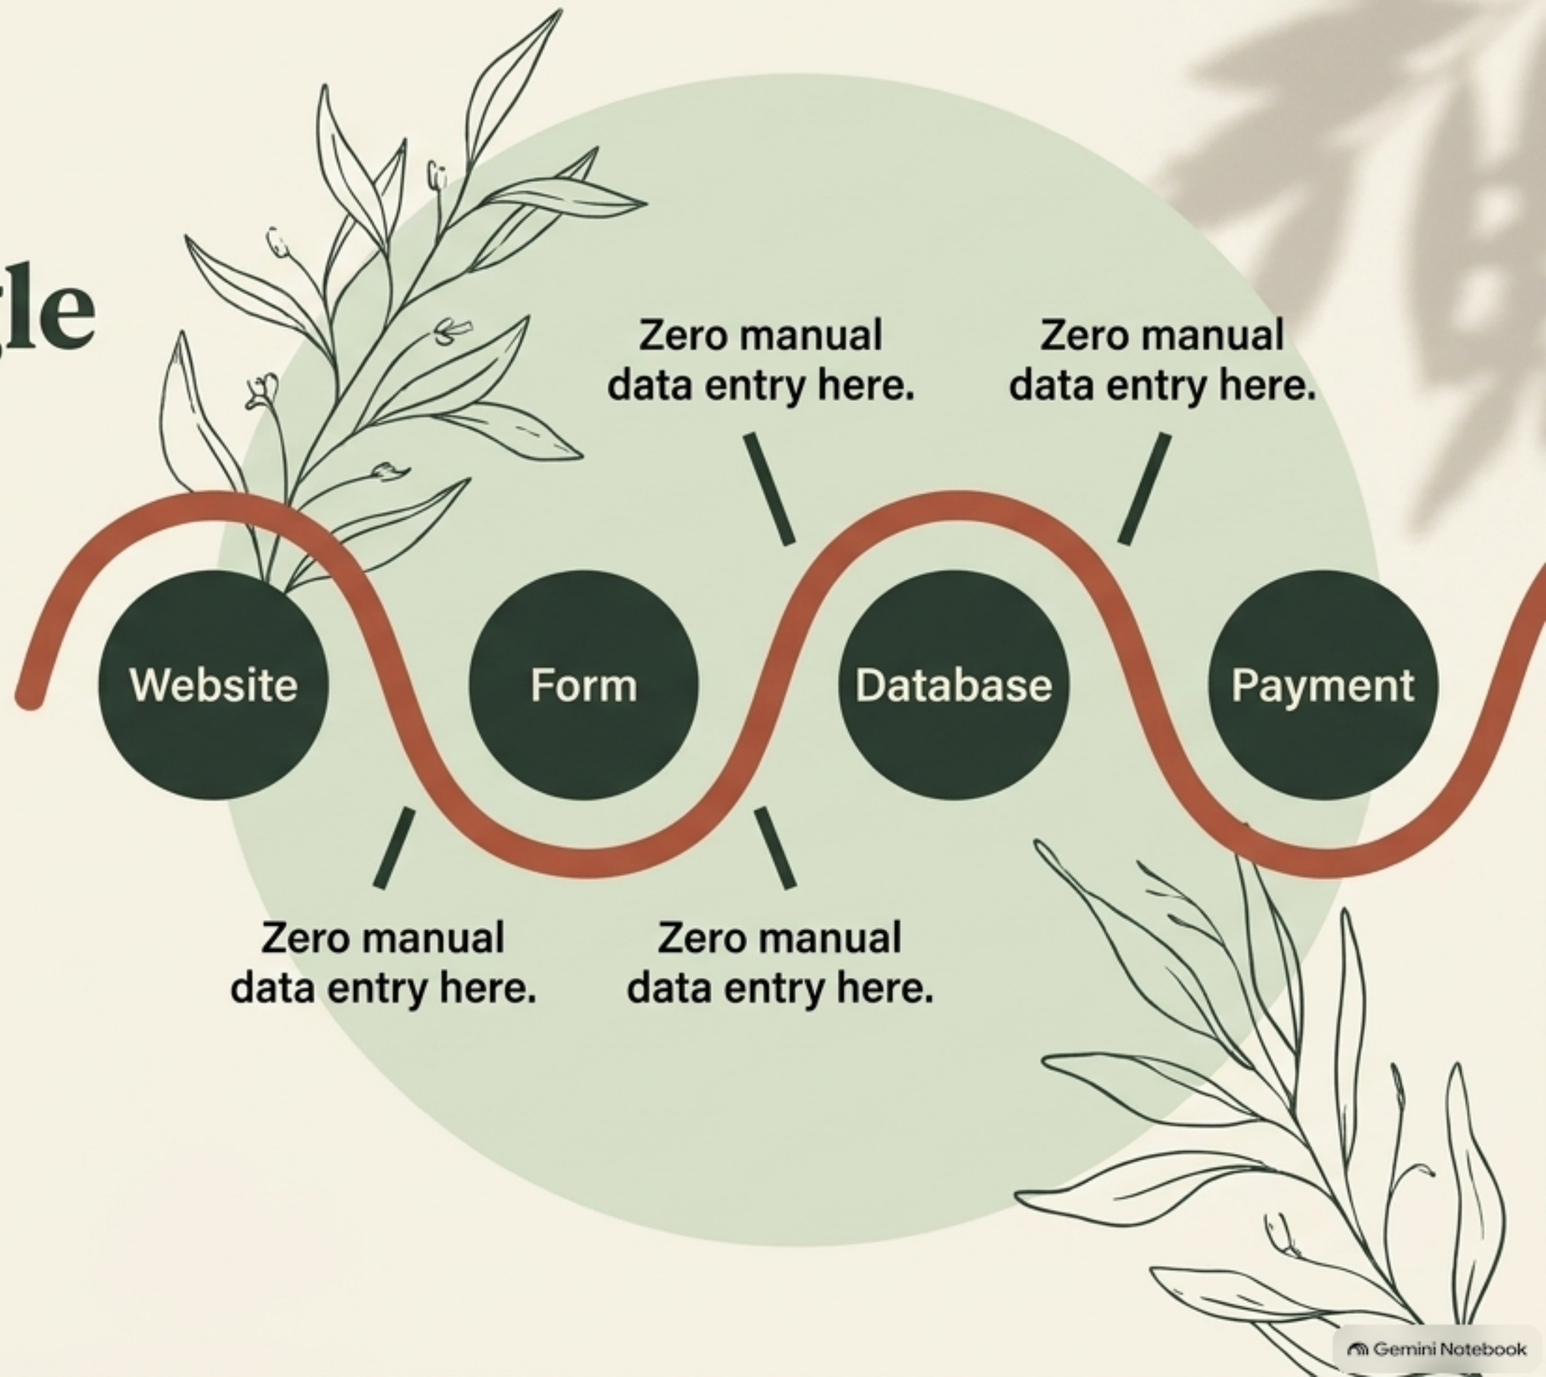

step three

Building the single connected flow.

The leaky funnel ends right here. We link your website, lead forms, client database, and payment gateways into one smooth, uninterrupted sequence.

A customer clicks, and the system handles the rest.

Nobody on your team ever has to copy and paste a single thing again.

Gemini Notebook

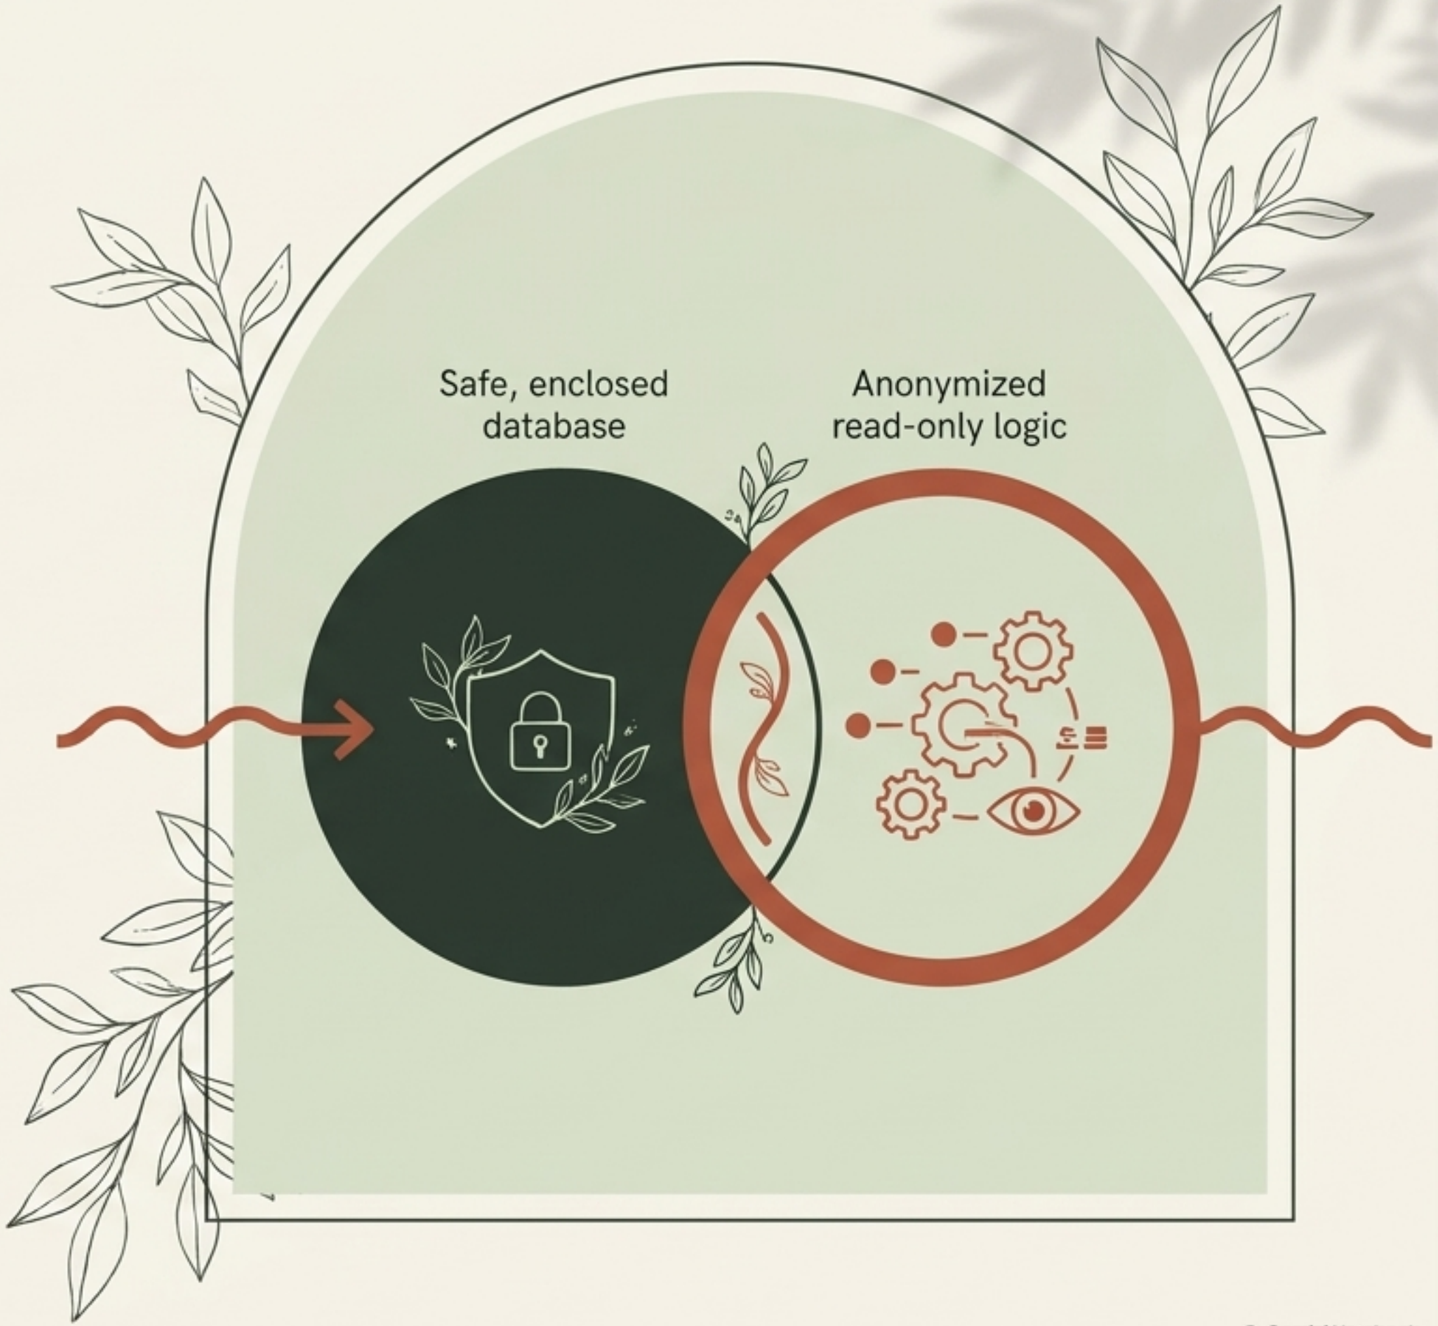

step four

Putting smart logic to work safely.

We use advanced system logic to handle the tedious jobs for you. Secure internal triggers automatically update your records and send follow-ups while staying safely locked inside your database.

For the complex external tasks, like analyzing pricing quotes, we use read-only processing that never stores or shares your private data.

The heavy lifting is done for you, securely and quietly.

Gemini Notebook

the build

Fixed builds, zero surprises.

We build in thirty-day sprints. No never-ending retainers. You know exactly what it costs before we write a single line of code.

Starter

For around **three thousand dollars**, we deliver a clean, working database with basic tracking and automated follow-ups.

Growth

For **five thousand dollars**, we tackle complex workflows, lead scoring, and multiple software integrations.

Mature

For **seven thousand dollars**, we handle advanced multi-pipeline operations, strict compliance configurations, and team access controls.

Gemini Notebook

Protecting your revenue when money gets tight.

When interest rates bite and the economy tightens, a flawless system is your best defence. It stops valuable leads from slipping through the cracks and allows your business to do significantly more without hiring extra staff. We build systems that protect your cash flow, ensuring you can confidently knock off early and spend time with the kids.

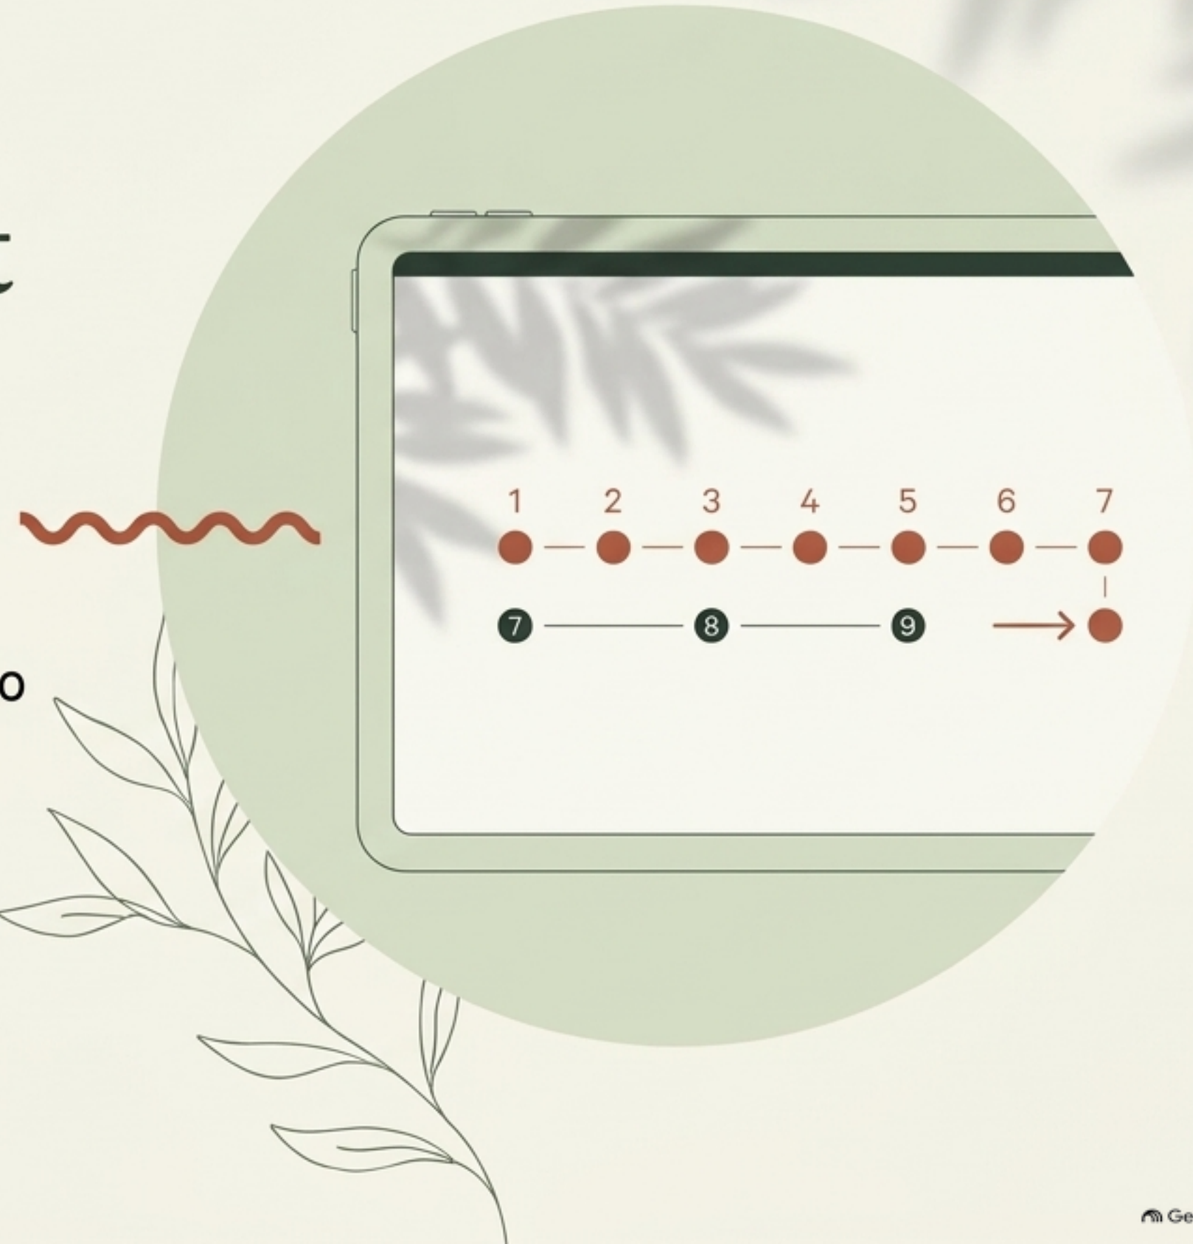

Gemini Notebook

the first move

Let’s figure out what you actually need.

You can skip the awkward sales calls. Jump on our website and run through a quick nine-question estimator. It takes two minutes to tell us about your current setup, and it gives you a tailored price estimate instantly.

When you are ready to get the boring stuff sorted, we are right here in Perth and ready to help.
